A MESSAGE FROM OUR MANAGING DIRECTOR

“I would like to take a moment to thank all of our clients and constituents for entrusting Stellaris Marine, and myself, to provide them with our services and support. In an ever-changing environment and industry, adaptation and vision are required in order to compete at the highest industry levels and standards.

We believe in Qatar’s wise leadership, aspirations and ever-growing industries. Like Qatar, Stellaris Marine brand is backed by decades of industry knowledge, experienced personnel, and continued innovation.

By providing quality services, dedication to our clients, in tandem with the opportunities offered by Qatar’s ever-growing industry and peoples, Stellaris Marine is able to be a leading marine and engineering consulting company from within Qatar and to the world”

INTRODUCTION

Stellaris Marine WLL is a Qatari marine services company founded in 2021 to provide marine and engineering consultancy and surveying services to the shipping and offshore industries. Our Clients include oil companies, drilling & offshore contractors, shipowners and charterers together with their legal and insurance interests.

A staff of highly qualified and experienced Master Mariners, Naval Architects, Civil, Structural and Marine Engineers provide a unique combination of professional expertise and consultancy.

In the marine transportation and offshore industry, the Company acts as marine consultant and/or marine insurance warranty surveyor. We advise our clients upon or approving the loadout, towage and installation of project cargoes. Installation of steel jackets and their topsides, concrete structures, floating production systems and mobile offshore drilling units.

In the shipping industry the Company provides a wide range of consultancy and surveying services. These include salvage, wreck removal feasibility and operations, collision investigations, damage assessment to port installations, cargo damage surveys, marine pollution assessment, condition surveys and charter party disputes of a varying nature.

The team of professional surveyors who operate in Qatar are able to respond quickly to attend at ports and offshore installations throughout the region.

A large offshore oil rig is shown at night, illuminated by its own lights. The rig is a complex structure of steel beams, platforms, and cranes, situated in the middle of the ocean. The sky is a deep blue, and the water is dark. The rig's lights create a warm glow, contrasting with the cool blue tones of the background. A vertical blue line with diamond-shaped ends runs through the center of the image, passing behind the text.
